

PlutoPDF (M8) v0.1.3.0 Build 20090719

Roger.Yi (roger2yi@gmail.com)

PlutoPDF is a PDF Reader software to read PDF digital document on MeiZu's M8 mobile. Its purpose is to read the PDF document fast and easy, also provide a good viewing effect.

Third Party Software

- 1 , PlutoPDF use mupdf as the rendering engine, the early version used already compiled version from tk11, and the later version used the version from sumatrapdf.
- 2 , PlutoPDF use Qt4.5 CE as the application framework; only use MeiZu's SDK in very minimal, so it will be easy to porting to other CE mobile platform.
- 3 , The icons used in PlutoPDF are source from VisualStudio2008 UI resource package (VS2008ImageLibrary.zip).

License

PlutoPDF is Open Sources software, it follows the GPL license. PlutoPDF used mupdf under GPL and used Qt under LGPL. You, as the user, can get a copy of the GPL/LGPL licenses from the install package and can download the source from internet: <http://code.google.com/p/pluto-hades/downloads/list>.

Features

- 1 , Support landscape screen reading
- 2 , Support multi-languages, support Chinese and English at now, according to the OS language settings
